Best Wild Duck Foods For Fall Planting

Choice Wild Rice For Table Use

OSHKOSH, WIS., U. S. A.

Fellow Sportsman:-

There's a big hatch of ducks, geese, coots and other waterfowl this year. Motion pictures we've seen taken on the breeding grounds, show ducks and geese thicker than we ever dreamed of.

Would you like to have these birds stop with you through the season, instead of just stopping for a rest and then going on their way? Ducks must eat, and do eat about 1/4 pound of food per day each. It's necessary if you want them to stay, that you provide them with enough attractive food to eat throughout the season.

Fall is Nature's seed-sowing time and the proper time for planting Wild Rice and Wild Celery seed and other duck foods named herein.

For three generations the Terrell family has been growing duck foods. We have learned a lot about how to grow foods that we are glad to pass on to you. Terrell's seeds are well-ripened, mature and full of life, handled just right and will give you the utmost in growth of duck food for each dollar you invest in seed.

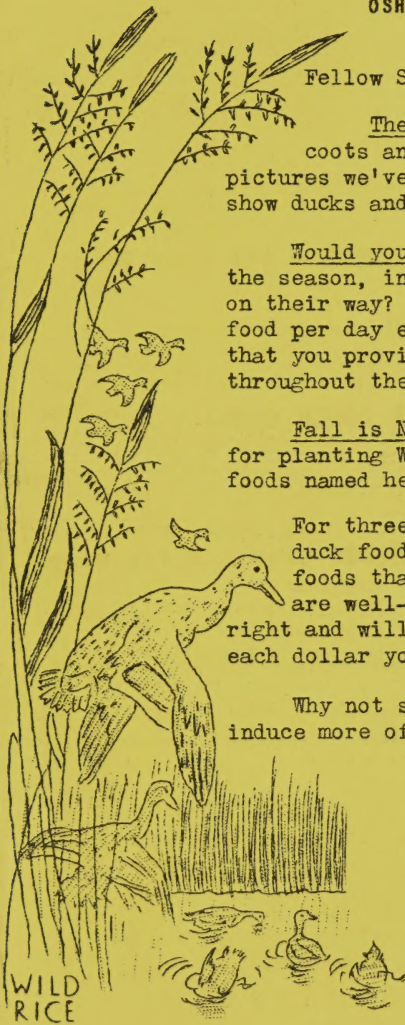

Why not send an order for seed for fall planting and induce more of the flight of waterfowl to stay with you?

Yours for More Ducks,

*Clyde B. Terrell*

For Fins, Furs, Feathers and Folks

P.S. See next page for details and prices.

## Duck Foods For Fall Planting

All of these are planted in the Fall. Coontail and Duck's Meat plants make food as soon as planted; Water Cress grows green in open springs all winter - the others when planted in fall start growth early next spring. They reseed, grow and spread year after year. Order your supply and plant before freeze-up. Detailed planting directions furnished.

### Giant WILD RICE Seed

Bu. \$19.50 Pk. \$6

2 qts. \$2. - (Postage 25¢)

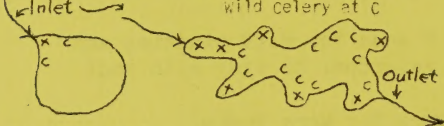

2 Bu. of Terrell's seed sows 1 Acre.

WILD RICE is excellent duck food and cover for Mallards and all marsh ducks, and geese. Get Terrell's big seed. It makes more food. Scatter seed where water is not wave-swept, less than 2 ft. deep, fairly free of dense growth. No mud belling or bother if you use Terrell's seed which sinks readily. Usually best to plant in rivers or lakes, ponds or marshes with outlet, or at an inlet where fresh water comes in.

WILD RICE must be kept damp and cool - if heated or dried its growing power is damaged. Make certain of sure-growing seed by ordering Terrell's - it is properly handled, well-ripened and recleaned of stalks, leaves and other trash. Plant N. of Savannah, St. Louis, San Francisco.

Plant Wild Rice at X  
Wild celery at C

### BUSHY POND PLANT or NAIAD

(Northern Variety (Najas flexilis))

PLANTS with ripe SEED. Bu. \$3. 5 bu. \$25. Sow 5 bu. per A. Excellent duck food, fish food and cover-producer. Carpets bottom. Grows few inches high. Sow in 1 to 5 ft. fairly clear water, sand or mucky bottom. Grows in slightly acid, hard, somewhat alkali, or slightly salt waters.

## MUSKGRASS For Marl Bottom Or Any Hard, Clear Water

PLANTS with ripe SEED SPORES (OOGONIA). Bu. \$3; 5 bu. \$12.50.

Scatter 5 bu. per acre in 1 1/2 to 5 ft. of water.

MUSKGRASS (Chara). Grows a few inches high carpeting bottom. According to U. S. duck stomach examinations it is the fifth best food based on amount eaten by ducks. It is especially attractive to Pintails, Mallards and Teal. Especially adapted to marl bottom, any hard water, or fairly alkali waters of the Dakotas. Will grow in water salty to taste, as well as fresh water.

FOR FISH it makes excellent cover and natural hatcheries and is very productive of crawfish, insects and other forms of fish food.

## WATER CRESS - All Year Food

PLANTS Bu. \$6.00.

PLANT in a few inches of water at hard water springs, streams, or flowing walls not freezing in winter. Makes all year duck and fish food, also delicious for salads and sandwiches.

## WAMPEE (DUCK CORN) (Peltandra virginica)

Good duck food. For Swampy land and fresh tidal waters in the East. Produces an abundance of seeds as large as kernels of corn. SEED (Sow 10 lbs. per acre), 10 lbs. \$3; 1b. 80¢ (\$1 post-paid).

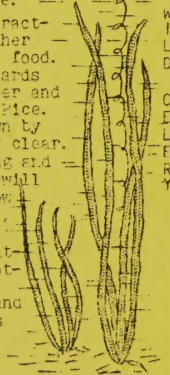

## WILD CELERY Seed - Fully Ripe

100 LBS. \$50; 20 LBS. \$13;  
10 LBS. \$8.; 2 LBS. \$2 (Postage 25¢)

Sow 30 lbs. of our seed per acre.

YOU will want WILD CELERY for attracting Canvasbacks, Bluebills and other diving ducks. It's their favorite food. Widgeons, Pintails, Teal and Mallards also use it. It will grow in deeper and more wave-swept waters than Wild Rice. Just see that water is hard (shown by shells, snails, etc.), and fairly clear. Broadcast seed pods after chopping and soaking in 2 to 4 ft. of water--will spread to deeper spots. Will grow on any fertile bottom except marl, even on sand.

WILD CELERY FOR FISH. Makes natural fish nurseries, binds the bottom, keeps silt from washing in and filling up ponds; clarifies and oxygenates the water and produces an abundance of fish food.

## Provide Food For Ducks **THIS FALL!** Plant **COONTAIL** and **DUCK'S MEAT!**

**FEED DUCKS AT ONCE!** Increase rapidly, making lots of wild and tame waterfowl food.

**COONTAIL** (Ceratophyllum) PLANTS, Bu. \$3.00. 5 Bu. \$12.50. Scatter 12 bu. per A. in 2 to 5 ft. quiet water where it will not wash out. COONTAIL is eaten by practically all Ducks and by Swans. Most productive of small forms of life for Fish Food of any water plant we know. Has no roots. Floats under water. Grows in either acid or hard fresh water. Stands shade.

### **STAR DUCK'S MEAT** (Lemna triculca)

PLANTS: Bu. \$3; 5 bu. up \$2.50 per bu. Grows from Missouri and Ohio northward. Praised highly for duck food by the Ontario Government. Thrives either in slightly acid or hard water, grows in somewhat alkali water in S. B. Ponds, flowerbeds, and waters with rushes or fallen timber afford good anchorage to plants which float submerged, and unrooted. Scatter 12 bu. per Acre in 2 to 5 ft. quiet water. Stays green all winter.

### **BIG SURFACE FLOATING DUCK MEAT** (Spirodela)

Good duck and fish food for quiet waters throughout U. S. Not rooted to bottom, just floats on surface of water. Makes food at once. Grows rapidly, will provide lot of food in short time. June to Oct. delivery. Plants: Bu. \$3; 5 bu. (sows acre) \$12.50.

### **ELODEA** (Anacharis)

Carp-resistant, quick-growing food for Redheads, Mallards, Widgeon, Scaups, Teal. Endorsed by "Ducks Unlimited." For hard, clear, fresh water, even if quite cold. Plants: Bu., \$3; 10 bu., (sows 1 acre) \$25.

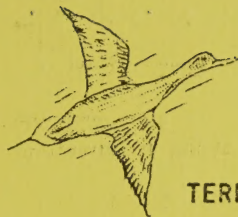

### **GIANT BURREED** (Sparganium eurycarpum)

Seeds as big as kernels of corn. Makes good food for Mallards, Black Ducks, etc. "Tops" as Muskrat food and house material. Its rush-like growth, 2 to 3 feet tall, makes excellent cover, and its network of heavy, quarter-inch runners, hold banks, stop erosion, and cause it to spread quickly. Survives floods, drought, and complete drying of land. Does best in not over 1 foot water. Thrives throughout U. S. PLANT on shores, marshes, lowlands, ditch banks and dars.

SEED: Lb., \$1; 10 lbs. (sows acre) \$8.

## **SERVICES OF SPECIALIST TO PLAN, PLANT AND IMPROVE YOUR WATERS**

ASK ABOUT IT. If you have a fairly large planting to be made, you can save time, money, and get better results by taking advantage of our life-long experience in this work.

## WE WANT TERRELL'S NATURAL DUCK FOODS!

WISCONSIN: "We have a wonderful stand of your Wild Rice. We are well pleased with your work and hope to continue our program with you." O. L. WEBER, Weber Lifelike Fly Co., Portage County.

"Your Wild Celery is going very nicely." V. E. GANTENBEIN, Pierce Co.

MINNESOTA: We purchased Wild Rice from you for planting along the Mississippi River. It has done extremely well. We are very much pleased with the results and believe they will be reflected in better duck shooting this fall."

DR. ALBERT M. SNELL, Olmstead County.

MICHIGAN: "We have many acres of Wild Rice from the seed we purchased from you. We had more ducks here than any time in the last 10 years."

E. C. UNDERWOOD, Luce County.

ONTARIO-- QUEBEC: "Wild Rice has taken in practically every part of the Bay. The Bay is full of Wild Celery -- We only put in 3,000 tubers of this this spring."

SHIRLEY E. WOODS, Woods Mfg Co., Ltd.

CHICAGO: "The Wild Rice for Table Use which I purchased here is not as good as that which you sent me - Would like your folder suggesting ways of preparing Wild Rice."

Anne Newman, IZAAK WALTON LEAGUE HEADQUARTERS.

WIS. CONSERVATION DEPT.: "We feel that there is no one in this country as well qualified as you are to carry on the work of aquatic biology." Wm. F. GRIMMER, Supt. Game Management.

"TERRELL'S WILD RICE FOR TABLE USE tastes like sunshine and fresh air, a tang of the wide open spaces. Believe this could be boosted as a health-cereal."

D. P. S., SUNDERLAND LABORATORIES, Health Test Service, Toledo, O.
